Art Unit: 1755

The rejections outstanding from the previous office action are withdrawn in view of the response filed 17 January 2006. Application 10/511516 is newly available to the examiner. A double patenting rejection thereover follows.

Claims 1-68 of this application conflict with claims 1-68 of Application No. 10/511516. 37 CFR 1.78(b) provides that when two or more applications filed by the same applicant contain conflicting claims, elimination of such claims from all but one application may be required in the absence of good and sufficient reason for their retention during pendency in more than one application. Applicant is required to either cancel the conflicting claims from all but one application or maintain a clear line of demarcation between the applications. See MPEP § 822.

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 16-18 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 16-18 of copending Application No. 10/511516. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented. With the limitation of the method of contact, these claims are indistinguishable in scope.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed.

Art Unit: 1755

Cir. 1998); In re Goodman, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); In re Longi, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); In re Van Ornum, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); In re Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and In re Thorington, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-68 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-25, 26+19, 47+36, 48+36, 49+48+36, 50+48+36, 51+41, 52+51+41, 53+51+41, 54+44, 55+54+44, 56+54+44, 57+50+48+36, 58+53+51+41, 59+56+54+44, 60+57+50+48+36, 60+57+50+48+36, 61+58+53+51+41, 62+59+56+54+44, 63+60+57+50+48+36, 64+61+58+53+51+41, 65+62+59+56+54+44, 66+63+60+57+50+48+36, 67+64+61+58+53+51+41 and 68+65+62+59+56+54+44 of copending Application No. 10/511516. Although the conflicting claims are not identical, they are not patentably distinct from each other. While the claims differ in that the '516 application requires that the mixture of gases be introduced into the process liquid/juice in that the instant application only requires that the juice is "exposed" to the mixture of gases, the instant claims fully encompass those of 10/511516.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
